

Supplies Needed for Chemistry Classes

1. Nongraphing, nonprogrammable, scientific calculator (many students find the 2 line display very useful). Several models are available for under \$20. Below is a list of a few suggested models:

TI 30XIIB or TI 30XIIS, but NOT the TI 34II Casio FX115, FX280, FX300 Sharp EL520, EL531, EL546

Note: Many of these models come in several variations designated by letters following the model numbers given above.

2. Three ring binder with pockets or one without pockets and a folder that can be placed within (i.e., has 3 holes). This notebook should not be used for any other subject.

3. Threehole punch. The kind that can be put into the three ring binder is fine.

4. Ten dividers that can be placed into your three ring binder.

5. Stapler.

6. Scissors.

7. Two packages of blank (no lines) 4" x 6" index cards.

8. A 1 GB Thumb Drive
